1. Programme Specification

Programme/award title(s)	BA (Hons) Fashion Design Top up
Teaching Institution	Bridgwater and Taunton College
Awarding Institution	The Open University (OU)
Date of latest OU validation	2014/2015
Next revalidation	
Credit points for the award	120
UCAS Code	
Programme start date	September 2015
Underpinning QAA subject benchmark(s)	QAA Art and Design (2008); History of art, Architecture and design (2008); Communication, media, film and cultural studies (2008)
Other external and internal reference points used to inform programme outcomes	The Framework for Higher Education Qualifications (FHEQ) (2015) Foundation Degree Qualification Benchmark (FDQB) (2010) SEEC Credit Level Descriptors (2010)
Professional/statutory recognition	
Duration of the programme for each mode of study (P/T, FT,DL)	One year Full Time Two years Part Time
Dual accreditation (if applicable)	Not Applicable
Date of production/revision of this specification	January 2015

Educational aims and objectives

The programme is intended to:

- Prepare students for personal development, further study, professional practice and employability;
- Deliver intellectually and creatively challenging programmes of study in a broad range of Art and Design disciplines
- Provide environments within which a range of appropriate teaching and assessment approaches promote and support learning in art and design
- Promote teaching and learning, offering students appropriate choices within specified parameters, through a credit rated structure
- Ensure the relevance of programmes by drawing upon research, scholarship, creative and professional practice
- Widen access and offer opportunities for the study of art and design at BA level
- Develop a range of subject-specific conceptual and technical abilities for continuing practice in students' chosen subjects
- Provide an academic framework that stimulates debate, the identification of interests, intentions and ideas, that encourages innovation, and the questioning of received habits, codes and conventions of thought, production and signification;
- Promote informed awareness of the cultural, social, historical and contemporary contexts of the subjects studied
- Develop students' key (transferable) skills to support and complement subject specific skills

Offer opportunities to facilitate progression to MA/MPhil/PhD

Relationship to other programmes and awards

The BA (Hons) Fashion Design programme has been written as a sustainable progression route from the Fashion Design FdA programme.

2. Programme Outcomes

Intended learning outcomes are listed below for Level 6 – BA (Honours) top-up

A. Knowledge and understanding	
Learning outcomes:	Learning and teaching strategy/ assessment methods
<p>By the end of the programme learners will be able to:</p> <p>A11: Demonstrate critical understanding of research methodologies in relation to their field of practice through research, making and associated documentation of practice</p> <p>A12: Develop, analyse and critique an in-depth and systematic understanding of a specialised field of study through the effective usage of primary and secondary sources.</p> <p>A13: Develop and demonstrate an understanding and knowledge base of materials, techniques and processes that are integrated within practical work</p> <p>A14: Apply specialist knowledge and expertise to resolve ideas and intentions through research, interpretation and synthesis</p>	<p>Primary</p> <ul style="list-style-type: none"> • One-to-one and group seminars and tutorials • Directed and independent study. • Research and project work • Active independent making. <p>Secondary</p> <ul style="list-style-type: none"> • Case studies • Problem-solving exercises • Tutorials. • Verbal feedback • Effective online research. <p>Assessment</p> <p>Key knowledge and understanding is assessed via a combination of presentations and seminars and in the production of creative responses to set studio briefs.</p>

B. Cognitive skills	
Learning outcomes:	Learning and teaching strategy/ assessment methods
<p>By the end of the programme learners will be able to:</p> <p>B11: Interpret and synthesize knowledge, ideas and information to generate new solutions and creative outcomes.</p> <p>B12: Organise knowledge and construct investigative strategies in relation to both studio and professional practice to undertake critical analysis, thinking-through-practice, reflection and evaluation.</p> <p>B13: Devise and construct complex and unfamiliar contexts that extend thinking and understanding through practice undertaking a critical analysis evaluating the outcomes.</p> <p>B14: Set own criteria for the production of practical work and test and evaluate this in relation to ideas.</p>	<p>Primary</p> <ul style="list-style-type: none"> • One-to-one and group seminars and tutorials • Directed and independent study. • Research and project work • Active independent making. <p>Secondary</p> <ul style="list-style-type: none"> • Case studies • Problem-solving exercises • Tutorials. • Verbal feedback • Effective online research. <p>Assessment</p> <p>Key knowledge and understanding is assessed via a combination of presentations and seminars and in the production of creative responses to set studio briefs.</p>

C. Practical and professional skills	
Learning outcomes:	Learning and teaching strategy/ assessment methods
<p>By the end of the programme learners will be able to:</p> <p>C11: Formulate own criteria and take responsibility for managing own workloads and in negotiating independent learning</p> <p>C12: Sets criteria for the development of own learning using analysis, project initiative, and reflection to appraise actions, own capabilities, and alternatives</p> <p>C13: Reflect upon own capabilities, appraise alternatives and evaluations, plan and implement appropriate actions</p> <p>C14: Present and explain ideas effectively and engage in constructive debate in a professional and well-informed manner.</p> <p>C15: Present practical and promotional work to audiences in a range of situations using appropriate media and apply professional skills to support their own practice and /or the practice of others.</p>	<p>Primary</p> <ul style="list-style-type: none"> • One-to-one and group seminars and tutorials • Directed and independent study. • Research and project work • Active independent making. <p>Secondary</p> <ul style="list-style-type: none"> • Case studies • Problem-solving exercises • Tutorials. • Verbal feedback • Effective online research. <p>Assessment</p> <p>Key knowledge and understanding is assessed via a combination of presentations and seminars and in the production of creative responses to set studio briefs.</p>

D. Key/transferable skills	
Learning outcomes:	Learning and teaching strategy/ assessment methods

D. Key/transferable skills	
<p>By the end of the programme learners will be able to:</p> <p>D11: Critique and evaluate the development of their practice in relation to key themes and practices and in response to the critical judgments of others</p> <p>D12: Locate and develop new research strategies with autonomy within agreed guidelines and take responsibility for accessing support and research opportunities.</p> <p>D13: Select, test and develop new techniques and processes to own performance and identify how these might be integrated and evaluated</p> <p>D14: Effectively demonstrate specialist practical skills within own area of practice and work effectively and professionally as a team in all aspects of exhibiting.</p>	<p>Primary</p> <ul style="list-style-type: none"> • One-to-one and group seminars and tutorials • Directed and independent study. • Research and project work • Active independent making. <p>Secondary</p> <ul style="list-style-type: none"> • Case studies • Problem-solving exercises • Tutorials. • Verbal feedback • Effective online research. <p>Assessment</p> <p>Key knowledge and understanding is assessed via a combination of presentations and seminars and in the production of creative responses to set studio briefs.</p>

3. Programme Structure

The diagrams below document the module structure for the Level 6 – BA (Hons) Top-up qualification for full time and part time students.

Programme Structure - LEVEL 6 Full-time			
Core modules	Credit points	Optional modules	Credit points
(FDVC56) Context	30		
(FDIN57) Inspiration and Innovation	30		
(TDRE58) Resolution	60		

Programme Structure - LEVEL 6 Part-time Yr1			
Core modules	Credit points	Optional modules	Credit points
(FDVC56) Context	30		
(FDIN57) Inspiration and Innovation	30		

Programme Structure - LEVEL 6 Part-time Yr2			
Core modules	Credit points	Optional modules	Credit points
(TSRE64) Resolution	60		

Students who have successfully achieved 120 credits at level 6 will be awarded a BA (Hons) qualification.

Students who have successfully achieved 100 credits at level 6 (excluding module FDVC62 Context at 20 credits) will be awarded an Ordinary Degree

Distinctive features of the programme structure

**Where applicable, this section provides details on distinctive features such as:
where in the structure above a professional/placement year fits in and how it may affect progression**

any restrictions regarding the availability of elective modules

where in the programme structure students must make a choice of pathway/route

The programme includes the following at level 6;

- Full workshop access
- Dedicated workspace
- Focus on industry links
- Engagement with practicing designers
- Opportunities to visit Trade shows
- Tutors who are all practitioners in their subject area
- Business skills and portfolio preparation
- Innovative processes and the creation of new materials / products
- Competition and exhibition opportunities
- State of the art facilities in new purpose built Arts House
- Contextual research to support studio work
- Work placement opportunities
- Employment and presentation skills
- Promotion and development of advanced design skills
- Resolution of individual port-folio targeted to a specific career path
- Final year exhibition
- Promotion of innovative and original design outcomes

Personal and Professional Development (PDP) is an integral part of the curriculum, providing the skills and knowledge students will need to be an active member of a learning community, to become a self-sufficient learner, and to be able to enter the professional world and manage their subsequent career development.

Support for students and their learning

During induction week all students are provided with a personal tutor. Formal meetings with the personal tutor are scheduled three times per year.

In addition, students meet with module lead tutors in seminar groups within a project-by-project basis. Each studio project brief differs in duration from five to ten weeks. Students meet the lead tutor for the project briefing, interim discussions, critiques and the final project presentation.

Additional pastoral tutorials can be arranged if necessary

Students are accommodated within purpose built studio spaces where they are afforded their own space. Adjacent to the studios and sited within the Arts House building is a range of computer and workshop facilities. These are timetables weekly and all programmes are given priority times across all the academic year.

The HE Study Centre (sited within the main campus building) provides students with academic support in relation to research and writing.

An HE academic support officer is available across the academic year in support of students with dyslexia, dyspraxia, learning difficulties and mental health issues.

Criteria for admission

All candidates will be invited to attend and interview bringing with them a portfolio containing examples of their work. Applicants applying for a 'top-up' course will need to have successfully completed a FdA qualification within a related subject area such for example: Fashion Design, Graphic Design, Illustration, Photography, Digital media or hold a qualification which is equivalent to level five.

Candidates for full-time courses will need to apply through the UCAS system (www.ucas.com), for those applying for part-time you can apply to the College direct.

Applicants who do not meet these course entry requirements may still be considered if the Admissions and Programme Managers identify that the application demonstrates additional strengths and alternative evidence. This might be demonstrated by, for example: related academic or work experience; the quality of the personal statement; a strong academic or other professional reference; or a combination of these factors.

All previous qualifications will need to be evidenced at enrolment on the course, including GCSEs.

Language of study

All classes are conducted in English. If English is not your first language you will be asked to provide evidence of your English language ability in order to apply and start the course. The standard English language requirement for entry is IELTS 6.0 with a minimum of 5.5 in any one paper, or equivalent.

Information about assessment regulations

Assessment will take the form of:

Formative Assessment – this is an interim review of student work undertaken at key points during particular modules. It provides an indicative measure of student progress, allows students to consider their work in relation to that of their peers, allows students to agree with staff any adjustments needed in order to satisfy course requirements, and is designed to help staff improve student performance. It does not contribute to the final unit mark.

Summative Assessment - is that carried out at the end of a unit. It provides an evaluation of student progress at the end of the module, generates a module mark, and confirms the conditions for referral or retake.

The Purpose of Assessment

Assessment measures student performance in completed module. It is therefore retrospective and should not necessarily be taken as a guide to future success. Assessment can have the following purposes:

- To measure student performance over a specified part of the course by published criteria against a stated requirement;
- To provide students with feedback about their performance, helping them to identify strengths and weaknesses;
- To determine the suitability to progress to the next stage of the course;
- To determine the award of an appropriate qualification.

The assessment process is designed to recognise and credit achievement rather than to penalise failure. If a student fails a unit there will be a further chance to improve work and pass.

Methods for evaluating and improving the quality and standards of teaching and learning.

The quality of the programme is annual monitored through evaluating:

- External examiner reports (considering quality and standards).
- Teaching observations and staff development reviews.
- National student surveys (NSS) and Student Perception Questionnaires (SPQ).
- Statistical information, considering issues such as pass rate.
- Student feedback (Student Voice), including module evaluation questionnaires.

The course team use this information to undertake annual monitoring, which, in turn, is monitored by the Bridgwater and Taunton College Academic Standards Committee.

The panel considers documents, meets with current/former students and staff before drawing its conclusions. This results in a report highlighting good practice and identifying areas where action is needed.

4. **Curriculum map for Level 6 – BA (Hons) Fashion Design Top-up**

This table indicates which study units assume responsibility for delivering (shaded) and assessing (✓) particular programme learning outcomes.

Level	Study module/unit	Programme Outcomes																
		A11	A12	A13	A14	B11	B12	B13	B14	C11	C12	C13	C14	C15	D11	D12	D13	D14
6	(FDIN61) Inspirations	✓				✓				✓					✓			
	(FDVC62) Context		✓				✓				✓					✓		
	(FDIN63) Innovation			✓				✓				✓					✓	
	(FDRE64) Resolution				✓				✓				✓	✓				✓

Module Specification Level 6

Module specification: FDVC56

1. Factual information			
Module title	Context	Level	6
Module tutor	Lorna Sheppard	Credit value	30
Module type	Taught / Self Directed - <i>Theory</i>	Notional learning hours	300

2. Rationale for the module and its links with other modules
<p>This module enhances each student's appreciation of in-depth research, in relation to their own evolving creative practice and to prepare them for their final major project. Students will develop academic or reflective writing skills in the contexts of their design practice by selecting and developing an appropriate research theme.</p> <p>In order to expand upon their chosen theme and shape an effective project structure, they will learn how to develop valuable research content from a wide range of primary and secondary sources. In this process of research, key cognitive skills are developed such as synthesis, creative and critical thinking, problem solving, and evaluation. With supervision and guidance through tutorials, learners will develop personal study modes and take responsibility for planning and implementing independent learning.</p> <p>This will link with the experimentation and innovation module GMCIM3 as students must present the relevance and in depth significance of their research to their practical work. This alignment through a presentation ensures students have to select research that informs their studio work and allows for the effective development and integration of those contexts in meaningful ways that they understand and have ownership of.</p>

3. Aims of the module
<p>This module enables learners to:</p> <ul style="list-style-type: none"> • Develop and integrate individual research interests that will provide a broader context for the student's design practice, both present and future • Assemble a clearly structured and well informed project that enhances students' learning to an appropriate level in relation to the contexts of their practice • Demonstrate and bring to fruition cognitive, analytical and research skills.

3. Aims of the module
<ul style="list-style-type: none"> • Produce, communicate and evaluate ideas and systematic research • Develop students' ability of critical self-evaluation and support them to become independent learners

4. Pre-requisite modules or specified entry requirements
None

5. Intended learning outcomes	
A. Knowledge and understanding	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i></p> <p>A12: Critically analyse, critique and evaluate in-depth and systematic understanding of a specialised field of study through the effective usage of primary and secondary sources.</p>	<p>Formal lectures. Group / One-to-one tutorials. Student presentations.</p>

B. Cognitive skills	Learning and teaching strategy
<p><i>At the end of the module learners will be expected to:</i></p> <p>B12: Organise knowledge and construct investigative strategies in relation to both studio and professional practice to undertake critical analysis, thinking-through-practice, reflection and evaluation.</p>	<p>Formal lectures. Group / One-to-one tutorials. Student presentations.</p>

C. Personal and Enabling Skills	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i></p> <p>C12: Set criteria for the development of own learning using analysis, project initiative, and reflection to appraise actions, own capabilities, and alternatives</p>	<p>Presentation of project proposals Peer review. Staff review. Tutorial guidance and support.</p>

D. Performance and Practice	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i></p> <p>D12: Locate and develop new research strategies with autonomy within agreed guidelines and take responsibility for accessing support and research opportunities.</p>	<p>Presentation on assessment criteria. Group seminar. Self directed study.</p>

D. Performance and Practice	Learning and teaching strategy

6. Indicative content.

At the beginning of the module students will attend lectures, seminars and tutorials. Supported by the staff team they will research, develop and offer a presentation that outlines the indicative content, proposed structure and research strategy for a written assignment.

During the module, each student will contextualise their own creative practice of fashion design, through the research of associated professional practice or practitioner.

They will research and write and submit two assignments for assessment – one at the mid-point and one at the end of the module.

7. Assessment strategy, assessment methods and their relative weightings

100% - Coursework.
.....

50% - **Written assignment A.**

Digitally published written assignment / Content of presentation.

50% - **Written assignment B.**

Harvard referenced essay / Content of presentation.

8. Mapping of assessment tasks to learning outcomes

Assessment tasks	Learning outcomes			
	A12	B12	C12	D12
Research	x	x		
Realisation		x	x	
Evaluation			x	
Personal Skills				x

9. Teaching staff associated with the module

Name and contact details

Lorna Sheppard

sheppardl@bridgwater.ac.uk

Module specification: FDIN57

1. Factual information			
Module Title	Inspiration and Innovation	Level	6
Module tutor	Alison Braybrook	Credit value	30
Module type	Studio based - <i>Practice / Theory</i>	Notional learning hours	300

2. Rationale for the module and its links with other modules
<p>This module enables each student to establish a research context and a set of ideas in relation to their own specific design practice. Students have the opportunity to research, develop and present their initial ideas that will form the basis of their research programme at level 6. Students will initiate a programme of research based on a chosen aspect of fashion and produce a range of ideas that will later culminate in a final collection of garments or accessories.</p> <p>The purpose of this module is the development of innovative approaches to the research and development of design proposals.</p> <p>Students enhance their creative process through experimentation and development, with an emphasis on its research and its wider professional contextualisation.</p> <p>Students will research and develop their own self-initiated project with defined reference to contemporary design practice and theory. They will carry out a series of experimental exercises that test the value of their own ideas. The module will support the development of a fluency in practical fashion design skills such as pattern cutting and the making of initial toils, as well as visual communication, the context and value of ideas with economic viability of the design proposals.</p> <p>Students will be required to test and incorporate new exploratory practices in relation to innovative research and ideas. This will enable students to acquire new skills along with progressing skills already established. Students should initiate an investigative approach that questions, challenges and experiments with a range of processes and materials and ideas. They will aim to develop and extend familiar ways of working and communicating ideas.</p> <p>To be valid this module must align with themes and concerns developed throughout module: Context FDVC56</p>

3. Aims of the module

This module enables learners to:

- Formulate theoretical and contextual links between research and practice through a willingness to explore new design methods, forms and ideas.
- Acquire new skills in material usage and processes.
- Employ the use of experimental production methods.
- Implement methods of working that links experimental outcomes to the generation of both ideas and concepts.

4. Pre-requisite modules or specified entry requirements

None

5. Intended learning outcomes

A. Knowledge and understanding	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i></p> <p>A11: Demonstrate critical understanding of research methodologies in relation to their field of practice through research, making and associated documentation of practice</p> <p>A13: Develop and demonstrate an understanding and knowledge base of materials, techniques and processes that are integrated within practical work</p>	<p>Workshop based activities. One-to-one / group tutorials. Group presentation / critiques. Technically supported; material / process investigation.</p>

B. Cognitive skills	Learning and teaching strategy
<p><i>At the end of the module learners will be expected to:</i></p> <p>B11: Interpret and synthesize knowledge, ideas and information to generate new solutions and creative outcomes.</p> <p>B13: Devise and construct complex and unfamiliar contexts that extend thinking and understanding through practice undertaking a critical analysis where outcomes are evaluated.</p>	<p>Individual and group tutorials. Group presentations/ critiques. Group discussion/ debate</p>

C. Personal and Enabling Skills	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i></p> <p>C11: Formulate own criteria and take responsibility for managing own workloads and in negotiating independent learning</p>	<p>Time management exercise Tutorials / Seminars Peer reviews One to one tutorial support.</p>

C. Personal and Enabling Skills	Learning and teaching strategy
C13: Present and explain ideas effectively and engage in constructive debate in a professional and well-informed manner	

D. Performance and Practice	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i></p> <p>D11: Critique and evaluate the development of their practice in relation to key themes and practices and in response to the critical judgments of others</p>	<p>Individual/ peer presentation- review Group critiques</p>

6. Indicative content.
<p>Students respond to a project brief which introduces an advanced design problem / scenario. Responding to the brief they follow their own disciplines in the research, development and presentation of a substantial body of creative work. The work may be largely research in the form of paper work and toiles, but a firm indication will be required as to the direction the collection will take as it is developed in the final module: Resolution58</p> <p>In addition to toils and designs, it would be expected that cloth/ materials and trimmings requirements would be largely sourced during this stage.</p> <p>Throughout this module students are encouraged by the staff team to develop an advanced relationship to experimentation that clearly informs their own creative practice.</p> <p>Students plan their own time in detail; they are supported through tutorials and seminars throughout this module.</p> <p>It would be expected that students would have a good level of relevant autonomous technical skills which would be discussed and support by the technical and staff team and would be facilitated within the technical workshops.</p> <p>Students compile a detailed document relating to their own employment aspirations for example – contact details and relevant information relating to: fashion design agencies, retailers, buyers and stylists, along with designer makers and self-employed freelance designers. This information is used enable/ facilitates collaborations in the final studio module.</p>

7. Assessment strategy, assessment methods and their relative weightings
<p>100% - Coursework</p> <p>60% - The development of ideas and contextual research of design proposals <i>Research journal</i> (this can take the form of digital publishing, journals, sketchbooks / on-line blogs / / <i>Evaluation of research material</i>)</p> <p>40% - The presentation of design proposals / Professional practice folder <i>The submission of a range of finished design proposals.</i> <i>A ten minute visual and formal verbal presentation (viva voce)</i></p>

8. Mapping of assessment tasks to learning outcomes

Assessment tasks	Learning outcomes						
	A11	A13	B11	B13	C11	C13	D11
Research	x	x		x			
Realisation	x	x	x	x		X	
Evaluation							x
Personal Skills					X	X

Module Specification: FDRE58

1. Factual information			
Module title	Resolution	Level	6
Module tutor	Alison Braybrook	Credit value	60
Module type	Studio based - <i>Practice / Theory</i>	Notional learning hours	600

2. Rationale for the module and its links with other modules
<p>Students will establish a searching and increasingly independent enquiry into design practices with a clear focus the professional context.</p> <p>The 'resolution' project should be both a theoretical and practical culmination of the preceding modules, demonstrating an advanced articulation of ideas and concerns through design propositions.</p> <p>The process of project enquiry will result in an authoritative and autonomous body of practical work in a specialised area of design practice. This resolved and significant body of work will be refined through informed decision making and editing, which will be professionally presented to an outside audience.</p> <p>Students will be required to produce a programme of work that encompasses research development and the resolution of design ideas in their chosen specialism within fashion design and culminates in the display of work in an appropriate context and setting.</p> <p>Students will also be required to develop and update portable or digital professional practice portfolios that visually describe, explain and promote their work equipping them to pursue career choices.</p>

3. Aims of the module
<p>To enable learners to:</p> <ul style="list-style-type: none">• Plan, create and produce a substantial and coherent body of work, informed by associated research and processes, and contemporary design contexts.• Revise and refine a negotiated conceptual proposal to distinguish a creative identity• Develop a professional portfolio that establishes a public profile using appropriate media or technologies• Set out a critical framework in which practical outcomes can be reflected upon and analysed.

4. Pre-requisite modules or specified entry requirements	
None	

5. Intended learning outcomes	
A. Knowledge and understanding	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i> A14: Apply specialist knowledge and expertise to resolve ideas and use of materials and processes through research, interpretation and synthesis</p>	<p>Updated proposal Studio work Sketchbook Tutorials / Group critiques</p>

B. Cognitive skills	Learning and teaching strategy
<p><i>At the end of the module learners will be expected to:</i> B14: Set own criteria for the production of practical work and test and evaluate this in relation to ideas.</p>	<p>Group critiques</p>

C. Personal and Enabling Skills	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i> C14: Present practical and promotional work to audiences in a range of situations using appropriate media and apply professional skills to support their own practice and /or the practice of others.</p>	<p>Group critiques Seminars Building and exhibiting work in group show</p>

D. Performance and Practice	Learning and teaching strategy
<p><i>At the end of the module, learners will be expected to:</i> D13: Effectively demonstrate specialist practical skills within own area of practice and work effectively and professionally as a team in all aspects of exhibiting.</p>	<p>Preparing work for exhibition</p>

6. Indicative content.
<p>Prior to the outset of this module each student will develop and present a project proposal which documents their specific area of study including a chosen market area within fashion design.</p> <p>This final module facilitates the student's production of a collection which relates specifically to their field of study and demonstrates their ability to cope and resolve the technical and design problems that may arise from it. It is expected that there will be a strong technical element to support the design work and that the module as a whole will promote innovative development and outcomes within the context of their personal fashion collection.</p> <p>Once project proposals have been agreed by the staff team, students will embark upon a detailed research and developmental process. This process will inform and</p>

6. Indicative content.

direct a focused and significant and body of resolved design work. Students will be supported in regular studio discussions and debates by the technical and academic staff team to the realisation and evolution of their project proposals.

The research and design development process must be documented in detail and presented, debated and discussed in regular project review meetings to both the staff team and peer groups.

At the end of the module each student will present work of a professional standard (both research and finished design proposals) in an exhibition setting and formal verbal presentation

The work generated during this module must clearly underpin and support each student’s projected professional aspirations.

7. Assessment strategy, assessment methods and their relative weightings

100% - Coursework

30% - The detailed development and testing of design concepts and proposals

- A detailed time schedule and creative management plan.*
- Contextual research / Material, process and value testing.*
- Research journal (taking the form of sketchbook, digital publishing or journal.*
- Written evaluation to the validity of research processes, materials and platforms.*

70% - The presentation of the final design proposals

- A professional practice folder – industry links, employment opportunities*
- The submission of a collection of finished design proposals.*
- A twenty minute presentation and oral exam (viva voce).*

8. Mapping of assessment tasks to learning outcomes					
Assessment tasks	Learning outcomes				
	A14	B14	C14	C15	D13
Research	x				
Realisation	x	x	x	x	x
Evaluation		x			
Personal Skills			x
